THE RICHMOND TERMINAL WAS ESTABLISHED IN 1903, AND IS THE LEGAL COUNTY AND CITY NEWSPAPER. RICHMOND'S NEWS SUMMARIZED

The Terminal boosts and advertises Richmond, directly increasing your property values.

THE RICHMOND TERMINAL

The Terminal is the oldest newspaper in Richmond and has the confidence and support of pioneer

VOL. XXV. RICHMOND, CALIFORNIA, FRIDAY, MARCH 2, 1928 No. 8

Registrations Are Far Below Average

Apathy of Voters May Be Cause For "Alarm"

What's the matter with the voter this presidential year? Something wrong. Not one-half of the voters of the county are registered.

Every loyal American eligible to vote should register.

As long as you are apathetic and put up the flimsy excuse, "What's the use," you'll get just what you don't want.

It only requires a few minutes to register, and doesn't cost a penny. Your vote is valuable.

Don't throw it away.

Here are the dates up to which time you can register:

March 10, City elections.

March 31, presidential primary.

Oct. 6, general election for the county, state and president.

Tax Commission Hearings Begin

Sacramento, March 1.—Governor Young's tax commission is holding an open hearing here today, seeking information, criticism and suggestions relative to the state tax system.

Following a 3-day session here, the commission will convene Tuesday, March 6, in the state building at San Francisco for a week, after which sessions will be held in Fresno and Los Angeles. Irving Martin is chairman.

Bay Bridge Hearing Is Set For March 21

Washington, March 1.—Hearings on the San Francisco Bay bridge span will open March 21 before the house committee on interstate and foreign commerce, as has been announced by Chairman Parker.

The hearing is to last two days. The essential point to be decided is whether the war dept. has supreme authority in granting a bridge permit over that of congress.

Reward Offered For Bank Bandits

The Bank of Italy has offered a a reward of $1000 for the bandits who held up the Grand Lake bank Tuesday and carried away $1500.

Spring Fashion Shows

Spring fashion shows are now attracting crowds to the show window displays of the eastbay stores. Richmond merchants have made extra efforts to excel in window attractions, rivaling the large city stores for attractiveness.

PERSONAL

Mr. and Mrs. Geo. R. Calvert accompanied by Mr. and Mrs. Eugene Sneed, spent the week end in Sutter and Yuba counties, with Marysville the principal stopping place, the Sneeds' former home city.

THE TERMINAL, oldest newspaper in Richmond.

When the final roll call takes place, the size of a man's roll will not amount to much.

A hypocrite is one who pretends to believe you when he knows you are lying.

In the real drama of life the leading ladies are cooks.

California to Send 29 Delegates to Kansas City

For general information and in answer to innumerable questions, the following may be of service in interpreting the official call for the republican national convention, to be held in Kansas City June 12, 1928.

The total number of delegates required is 1089, apportioned as follows:

1. Four delegates at large from each state.

2. Two additional delegates at large for each republican at large in congress from each state.

3. Two delegates at large from Alaska, District of Columbia, Porto Rico, Hawaii and the Philippine Islands.

4. One district delegate from each congressional district.

5. One additional district delegate from each congressional district casting 10,000 votes or more for any republican elector in the last preceding presidential election.

One alternate delegate to each delegate to the national convention.

California, Kentucky and Iowa will have the same number of delegates, 29. Seven of the 29 are delegates at large.

In order to receive the nomination for president and vice-president, the number of votes required is 545.

Curious Alloys

In these days chemistry is enabling man to make over some of the most useful metals very much at his will and greatly to his profit. In England interesting reports have been made on the properties of alloys of copper, aluminum and manganese, which show remarkable peculiarities. An alloy of 88 per cent copper, 9.90 per cent aluminum and 2.01 per cent manganese showed enormous tensile strength, a cold-drawn bar having a yield point of 40.88 tons per square inch and an ultimate stress of 52.08 tons per square inch. Another alloy is so hard that it can take a cutting edge sharp enough to sharpen a lead pencil. The British admiralty has been experimenting with these alloys in order to determine their resistance to corrosion in sea water.

Saxophone Player On World Tour

John Thornton, 19, Richmond saxophone player, leaves today with one of the Dollar line steamers, his itinerary comprising a trip around the world. He leaves San Francisco with the President Cleveland for the Orient, a steamer destined to circle the globe.

Sugar Refinery Heads Elected

At a meeting of the California Hawaiian Sugar refining corporation held in San Francisco, Geo. M. Rolph was re elected president. Mr. and Mrs. Rolph have not yet returned from their world tour, but are expected home soon. The other officers elected were. L. Campiglio, vice-president; A. M. Duperu, plant manager; W. F. Sampson, secretary-treasurer.

Men's Church Dinner

One hundred men members of the First Presbyterian church were present at the men's dinner held Tuesday night in the church parlors and heard Dr. P. T. Amstutz of Webster, Ohio, who came here to conduct the building campaign for the new church.

Getting Out of Patience

P. G. & E. Co. to Expend Millions In Improvements

Oakland, March 1.—An appropriation of $2,136,851 has been made by the Pacific Gas and Electric Co. for additions, betterments and maintenance to plant in the eastbay division, which comprises Alameda and Contra Costa counties, with headquarters at Oakland. The expenditures will cover work necessary for the operation of the company's gas and electric system in this territory. The additional improvements to the Oakland plant alone will amount to $187,000.

New mains to be installed in eastbay territory to care for new business will cost $250,000.

According to L. H Newbert, division manager, all sections now served by the company show a substantial growth during the past year. The company is now serv-967,717 customers.

"The new rate reductions to be made will result in a saving of $1,750,000 to customers. The new schedules are designed to assist and encourage lighting consumers to make more extensive use of electricity for heating and cooking," said Newbert.

Pittsburg Buys Park

Pittsburg, Mar. 1.—Purchase of the 20-acre nursery tract south of the city limits for development of a community recreation center was effected Tuesday at a meeting of the city council. The tract was secured for $32,000 and includes three wells producing water intended for distribution through the city's mains to augment the present domestic supply.

The face value of thirty pieces of silver mentioned in the bible is about $22 50.

Roman Utensils

While the housewife of today may reasonably pride herself on the conveniences her kitchen affords, she need not smile too supercilliously at the thought of the rude makeshifts of days gone by. She would certainly not do so were she to spend a little time inspecting the kitchen and other household utensils that were in use 2,000 years ago, as exhibited in the National museum at Naples. Saucepans lined with silver, pails richly inlaid with arabesques in silver and shovels handsomely carved figure among the household goods of those times.

It was in THE TERMINAL.

Del Valle Farm to Have New Dormitory

(Albany Argus)

The Christmas seal is a power in stamping out the dreaded white plague, and in time victims of tuberculosis will be unknown. The report of the Alameda county Tuberculosis association is most assuring, the amount of seals sold to date, and reports are all about in, being $18,000, which is slightly better than last year. Albany's contribution was slightly more than last year, $367.62. Last year it was $362 77.

All members of the committees of the county are to meet at Del Valle April 15 A new dormitory is being planned by the architect to displace the old one. The new building will include an admission department. Mrs. Laura H. Ryan, chairman of the Albany committee, would be pleased to hear from those interested in the seal movement and the Del Valle farm, that formal invitations may be sent them to attend the meeting.

Swift's Great Power as Satirist of Vice

Swift is unquestionably the greatest of English satirists, and it is interesting to observe why he is so much more effective than our numerous satirists today, of whom we have God's plenty. The reason—apart from the incomparable austerity and beauty of his prose style—is not far to seek. It can be stated in two words. Our present contemporary satirists ridicule virtue; Swift ridiculed vice. Our living satirists attack religious and moral people, and, above all, they make fun of anyone intensely in earnest. If this earnestness is directed not toward the predatory selfish satisfaction of lust or lucre, but expresses itself in religious, moral or social reform, then the satire takes on increasing intensity. Swift attacks treachery, ingratitude, lechery, pimping, uncleanness, hatred, envy, swinishness, avarice, and the wholesale murder sentimentalized under the name of patriotism. And it is because these degrading vices were all about him in England in 1726 and all about us in England and in America at present that the cutting edge of his sword went so deep and made so many victims wriggle, and it also explains why that sword has not lost its edge in 200 years.—William Lyon Phelps, in Yale Review.

A Different Way

A little girl went to stay with her aunt, and gravely watched her saying her prayers the first morning. When the aunt rose to her feet again the child said:

"Auntie, do you say your prayers now as well as at bedtime?"

"Of course," said auntie "don't you?"

"No, I say my prayers at bedtime and in the morning I do breathing exercises."

Women Pay Largest Part of Inheritance Tax

Bakersfield, March 1.—Addressing club women of this city, Dr. George C. Sabichi, president of the California Taxation Improvement association, told of the dampening effect of inheritance taxes on thrift.

Widows and children pay the largest proportion of state and federal death dues, he said, and declared the infliction of rates totaling 20 per cent and taking as much as 30 per cent of estates was a detriment to business.

THE TERMINAL, Richmond's industrial newspaper.

Truancy, called "playing hookey" by the youngsters, last year caused a waste of $250,000,000 according to an estimate made by the bureau of education. A little early learning saves many years of yearning.

Many things may be preserved in acohol, but law and order are not on the list.

Disuse of the Long "S"

The modern form of the letter "s" took the place of the old "f"-form of the letter very gradually. For many years the round "s" was used in all parts of words except the end, where the long "s" was retained. John Bell, a London publisher, was the first important publisher to discard the long "s" and substitute the round "s" in all words containing the letter. This he did in his edition of "The British Theater," which was published about 1775. The transition from one form of the letter to the other was almost simultaneous with the American Revolution. In 1786 Benjamin Franklin wrote: "The round 's' begins to be the mode, and in nice printing the long 's' is rejected entirely." After 1800 the old form of "s" seldom appeared.

Encouraging Trade

A bright-eyed little English lad saluted the occupants of a passing motor car so politely that they stopped and gave him sixpence.

"Do you salute all the strangers that pass?" the woman with the party inquired.

"No, ma'am, only motorists," the boy stammered, fingering his sixpence nervously. "Father says I must be polite to them because motor cars bring him trade."

The lady seemed disappointed.

"What is your fathers' trade, my little man? Does he repair motor cars?"

"No, ma'am," was the reply. "Father's an undertaker."—Exchange.

Much of the charity that begins abroad never reaches home.

State Official Raps Sierra Auto Route

How They Balloted in Former National Conventions

Now that convention days, ways and ballots are being discussed, the following tabulation as to the number of ballots that were required for presidential nominations in the republican and democratic nominations since the first republican convention in 1856 may prove of interest:

Republican Democratic

1856—Fremont on 1st; Buchanan on 17th.
1860—Lincoln on 3d; Breckenridge on 1st; Douglas on 59th.
1864—Lincoln on 1st; McClellan on 1st.
1868—Grant on 1st; Seymour on 22d.
1872—Grant on 1st; Greeley on 1st.
1876—Hayes on 7th; Tilden on 2d.
1880—Garfield on 36th; Hancock on 2d.
1884—Blaine on 4th; Cleveland on 2d.
1888—Harrison on 8th; Cleveland on 1st.
1892—Harrison on 1st; Cleveland on 1st.
1896—McKinley on 1st; Bryan on 5th.
1900—McKinley on 1st; Bryan on 1st.
1904—Roosevelt on 1st; Parker on 1st.
1908—Taft on 1st; Bryan on 1st.
1912—Taft on 1st; Wilson on 46th
1916—Hughes on 3d; Wilson on 1st.
1920—Harding on 10th; Cox on 44th.
1924—Coolidge on 1st; Davis on 103d.

Listener Not Taking Anything for Granted

A big mass meeting was being held in Bilmville.

The well-groomed and slick-looking individual who was trying to separate the town from its money arose to make a few remarks.

"Fellow citizens," he opened up, "apropos—"

"Jist a minute, mister," said a smallish, sandy-whiskered man.

A look of annoyance crossed the speaker's face.

"What can I do for you?" he asked.

"I have here a pocket edition of Webster's dictionary and I want to look up that word 'apropos.' I don't intend to sit here and let some oily-tongued stranger slip one over on us."

"Oh, that'll be all right," replied the speaker. "Now, that word to which you refer means—"

"Never mind what it means," enjoined the little man. "I'm looking it up. I let a smooth talker sell me a unicycle one time. He said it was the last word in conveyances, and when I paid the freight on it from Chicago, I found I had purchased a wheelbarrow." — St. Louis Globe-Democrat.

Learned the Truth

The grandmother who was summering beside a lake with some of her little grandsons had a twinkle in her eye. "I thought when I first came here that I was tremendously popular with the little boys," she said. "Nearly every hour one or the other of them invited me to go rowing with him. Then I discovered that their mother did not permit them to go out in the boat unless an older person was with them. After learning that fact, I was not quite so puffed up over my popularity."

It Won't Be Long Now

San Quentin, March 1.—Soon arrangements will begin for the double hanging of the arch criminal, William Edward Hickman, and Edgar Lapierre. Both murderers will be executed Friday, April 27.

S. P. Agt. L. G. Eby announces the new train schedule will go into effect March 4.

The price of liberty is eternal vigilance—and it is always payable in advance.

State Controller Riley 'Riled' Over Road Taxation

Special to The Richmond Terminal.

Los Angeles, March 1.—A million dollar state highway was built by the state of California "to serve 4 persons and a jackrabbit," according to Controller Ray L. Riley of Sacramento, who has been talking before women's clubs in this vicinity the past week.

"You are paying an $820 tax bill, local, state and federal, per family," he said, adding that California has but one competitor in the per capita collection of taxes. That is New York. In 15 years the costs of government have risen from $18,000,000 annually to more than $100,000,000 for state purposes alone, the speaker revealed Presently $40,000,000 is being expended on roads each year, and but $4,000,000 on humanitarian agencies in California.

"It is true these roads are a wonderful asset to the state," Riley commented, "but I note that the department of public works has allocated seven or eight millions of dollars for a highway going up Feather river canyon. It will be an all year road to Nevada, and while it will serve the few people of that state, we must remember that the roads are closed east of there during the winter time. If it was constructed twenty years from now it would be soon enough. But we have plenty of money to spend."

During the course of his talk before the Republican women's study club here the controller hinted that a sales tax of a penny a pound upon sugar probably would be considered by the state tax commission, of which he is a member. It began hearings the 1st of March. Riley cited numerous increased costs in the many departments and commissions in which officials have been recently multiplied. Asked about this he said that the "the trouble in politice is to cut out jobs."

Declaring that our crowded universities are turning out more doctors, lawyers and school teachers than needed, the controller predicted that the school would have to seriously consider vocational education. That will add to its present costs. He expressed the belief that government could continue its present paternalistic course "as long as we are willing to pay for it and do not mortgage the future." But he admitted the present system is badly out of joint.

"We inherited a free country," was his conclusion, "but we certainly are not leaving one to our children."

Office Manager of Sugar Plant Quits

Crockett, March 1.—R. H. Larkin, manager of the Crockett office of the Hawaiian Sugar refinery, has resigned and will leave for New York City. Larkin came to Crockett four years ago from Ohio to install a new accounting system which has practically been perfected.

To shoot a projectile to the moon would require a velocity of 7 miles per second. The average speed of our big guns is only one one-hundredth of that rate.

Have it printed at The Terminal.

WESTERN GIRL STRENGTHENED

By Taking Lydia E. Pinkham's Vegetable Compound

Manchester, So. Dakota.—"I was in a terribly weak and run-down condition when a friend told me about Lydia E. Pinkham's Vegetable Compound. I began taking it and after a short time I felt better. We are a family of five and live on a 360-acre farm, so I have quite a good deal to do both indoors and out. At first I was unable to do anything and had to have a girl, but after taking the Vegetable Compound I finally gained my strength back and also gained considerable in weight. I will gladly answer letters from women in regard to your medicine."—Mrs. Otto J. Geyer, R. F. D. 1, Box 20, Manchester, So. Dakota.

A Compromise

"How shall I ever meet my obligations?" groaned the bankrupt.

"Meet them half-way," suggested his legal adviser. And thereupon he made a 50 per cent assignment.—Boston Transcript.

Quart of Water Cleans Kidneys

Take a Little Salts If Your Back Hurts, or Bladder is Troubling You

No man or woman can make a mistake by flushing the kidneys occasionally, says a well-known authority. Eating too much rich food creates acids, which excite the kidneys. They become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood. Then we get sick. Rheumatism, headaches, liver trouble, nervousness, dizziness, sleeplessness and urinary disorders often come from sluggish kidneys.

The moment you feel a dull ache in the kidneys, or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, begin drinking a quart of water each day, also get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast and in a few days your kidneys may act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to flush and stimulate the kidneys; also to help neutralize the acids in the system, so they no longer cause irritation, thus often relieving bladder weakness.

Jad Salts is inexpensive; makes a delightful effervescent lithia-water drink which everyone should take now and then to help keep the kidneys clean and active and the blood pure, thereby often avoiding serious kidney complications.

Makes Life Sweet

For seven generations the National Household Remedy of Holland for kidney, liver and bowel troubles has helped make life brighter for suffering men and women. Begin taking them today and notice how quickly your troubles will vanish. At all druggists in 3 sizes.

W. N. U., San Francisco, No. 9—1928

CALIFORNIA NEWS BRIEFS

The weirdest verdict in the history of California jurisprudence was handed down one day last week in the case of the six convicts charged with the murder of Ray Singleon, Folsom guard, slain during the Thanksgiving riot. The jury found all six men guilty of murder in the first degree and fixed the penalty as life imprisonment.

The 1928 convention of the California Real Estate Association will be held in Sacramento, according to an announcement by Glenn D. Willaman, association secretary. The meeting has been set for the week of October 8 to 12.

Unless you submit proof that you have filed your application for 1928 automobile license plates you now are subject to having your car impounded until you have forwarded your application and double fee required—if you still are using 1927 plates. This is the announcement by Frank G. Snook, chief of the division of motor vehicles, who has notified traffic officers to stop every car still carrying 1927 plates.

The California Congress of Religious Education will meet in San Francisco March 18 to 20. Some of the meetings will be held in Native Sons' hall and others in the First Congregation church. Dr. Herman F. Swartz, president of the Pacific School of Religion, will preside. Dr. Miles Fisher, associate pastor of the First Congregational church of Berkeley, is secretary in charge of arrangements.

Bureaus of the State division of Motor Vehicles for convenience of tourists and law enforcement are to be established immediately at all border points where interstate highways enter California, it was announced a few days ago by Frank G. Snook, division chief. This step for better service to tourists in California was taken, following a conference at the last meeting of Governor C. C. Young's cabinet, on instructions given Snook by Alexander R. Heron, State director of finance.

Actual construction work upon the North Fork highway, authorized last week by the California highway commission, will be under way by July 1, with convict camps established at each end of the road, Bert B. Meek, state director of public works, announced a few days ago. Location survey parties will be placed in the field at once, he said. The two convict camps will contain approximately 160 men. Initial construction costs and expenditures for equipment will be made from the third State highway bond issued of $40,000,000.

Gov. Hartley of Olympia, Wash., believes the State of California sends too many officers to Washington to bring back its escaped criminals. During a Capitol committee meeting last week extradition papers were brought in for the Governor to approve. 'They've got three big huskies out there in front to take back two little fellows to California," he told the committee members. "Those fellows like to travel. There is a steady traffic between here and there. It's a poor day if we don't have one. Our parole officer brought back seven men from California, and they need three big fellows to take two little chaps back.

Seeking to recover $115,931.40 in taxes which it contends was paid to the State under protest, the Anglo and London-Paris National Bank last week filed suit for that amount against State Treasurer Charles G. Johnson in Superior Court. The action followed 24 hours after an identical suit had been filed by the Bank of Italy National Trust Saving Association for $355,386.80 in protested taxes. As in the Bank of Italy suit, that registered last week contended that because the complainant bank is a national one, a state cannot subject it to taxes unless given permission by Congress to do so.

Public utility corporations, farm bloc leaders, business representatives and all other Californians interested in tax matters will be given an opportunity to present their views on readjustment of the State taxation system at four public hearings to be conducted by the State Tax Commission within the next month Irving Martin, commission president, announced the hearing as follows: Sacramento Valley and Northern California hearing, at Sacramento, March 1 and 3, or longer is necessary Central California and San Francisco Metropolitan Area hearing, at San Francisco, March 6th, through 10th, if necessary. San Joaquin Valley hearing, at Fresno, March 12. Southern California and Los Angeles District hearing, at Los Angeles, March 13 through 17 if necessary.

California's timber, brush, grass and grain fire losses for 1927 totaled $1,133,244, according to a joint report issued a few days ago by State Forester M. B. Pratt and United States District Forester S. B. Show. The total is based on reports from Federal, State, county and private fire rangers. The loss was distributed as follows: State-protected area, $974,529; national forests guarded by the forest service, $133,210; districts protected by counties and associations under co-operative agreements, $314,938; other co-operative agencies, $308; unprotected areas, $110,357.

California vegetables had a total value of $64,158,000 during 1927, according to the annual State-Federal agricultural report. The most valuable vegetable was lettuce, which brought growers a return of $15,381,000. Cantaloupes ranged second with a value of $11,729,000.

The second annual wool growers' field day and demonstration to be held at Huron, Fresno county, has been set for March 10th, according to Assistant Farm Advisor J. C. Hays, who has been making the arrangements. The meeting is to be held under the auspices of the San Joaquin Valley District Wool Growers' Association, with the Fresno County Extension Service co-operating.

In addition to a premium of 2 to 3 cents because of high quality and whiteness, California cotton has been recognized as superior by a special grading confered on it by the United States Department of Agriculture. This information came last week in a letter to Arthur W. Palmer, head of the California Development Association's division of cotton marketing. The cotton was designated extra white.

O. H. Price, Etwanda, Calif., was acclaimed the world's champion orange grower at San Bernardino last week when Governor C. C. Young pinned upon him the medal awarded by the judges in connection with the National Orange Show held at San Bernardino last week. One hundred and thirty orange growers were competiting for the coveted gold medal, set with diomonds. Price has grown citrus fruits in the Etwanda district for the past thirty years.

Another State record has been broken by a cow in the herd of the University of California at Davis, according to Professor W. M. Regan of the animal husbandry division of the college of agriculture at the university. The Jersey heifer, California Napoleon's Abbie 630328, which was started on test when she was two years and seven months of age, has completed a Class AAA record, producing 648.47 pounds of butter fat and 10,258 pounds of milk in the 305 days. Her milk averaged 6.32 per cent fat, and for three successive months of the test her production was over 70 pounds of fat per month. She has won both gold and silver medals in addition to the State championship in the senior two-year-old class.

Development of California as an exporter of dairy products to the Orient was advocated at a recent meeting of dairy leaders of the State and educators at the University of California at Berkeley. B. H. Crocheron, director of agricultural extension, presided. It was pointed out that the United States as a whole is rapidly approaching an export rather than an import basis for products, and it was recommended that specific markets in the Orient be studied for California.

A possible new field crop for the San Joaquin Valley is suggested in the annual report of the chief of the Bureau of Plant Industry, United States Department of Agriculture. It is santonin, an important vermifuge obtained from Levant worm-seed, Artemisia cina. The supply is restricted by the producers in Turkestan. It is adapted to the San Joaquin and Sacramento valleys, the report says, and the price is high. The report also suggests crossing of California Black and Persian walnuts to obtain a better variety for the warm interior valleys of California, and discusses limb mutations of canning peaches indicating the possibility of better canning peach varieties

"Truck Crop Plants," a new text and reference book, has recently been published, reflecting the rapid increase in the importance of vegetable crop production. In California last year the value of truck crops was more than $60,000,000, which shows a remarkable gain in economic importance in the last decade. Throughout the State more and more attention is being given to such crops, and the increase in production has been attended by a corresponding increase in return to the farmers. The authors of the new text are Dr. H. A. Jones and Dr. J. T. Rosa of the division of truck crops, college of agriculture, University of California.

Navels from the Riverside district are still being held back from shipment as much as possible, until the frost-damaged Florida oranges can be disposed of in the eastern markets, according to local shippers. Sales of Riverside navels which have been shipped have been as high as $5 per box recently. Shipments for the season to February 1 totaled 681 cars of oranges and fourteen cars of lemons. To the same date last season, 1329 cars of oranges and forty-two cars of lemons had been shipped.

That the Santa Maria Valley may add rubber production on an important scale to its other activities is visioned by some growers as the result of the activities of the American Rubber Producers Inc., of Salinas, which is establishing 220 acres of guayule rubber plants there. The company is now setting out 215 acres to nursery plants, an addition to the five-acre experiment plot put in a year ago. Some 7360 guayule plants to the acre are set out with a planting machine developed by the company.

EXPLOSIVES IN VAN OF HUMAN PROGRESS

Man's Most Powerful Slave Used in Many Ways.

Washington.—"Booming detonations that a century ago could have meant only the thunders of war, are heard almost every day now by the inhabitants of any sizable city. They are the sounds of man's most powerful slaves, explosives," says a bulletin from the Washington headquarters of the National Geographic society, "carrying on their daily labors of peace for civilization; tearing loose materials for lime and cement, digging out stone for structures and roads, piercing hills, excavating that dams, railways and factories may grow. The pioneer slowly and laboriously slashed his way through nature's superficial barriers with his ax; with much less effort the modern engineer blasts his way through mountains, tumbles hills into valleys, and recasts the face of the earth to his liking and his need.

An Age of Explosives.

"Civilization has had its ages of stone and bronze and steel; of wind and water and steam power. It requires taking no great liberties with terms to call this an age of explosives. Man blasts out the route for a highway; makes it smooth with stone and cement blown out elsewhere; and all that it may be traversed by millions of vehicles propelled by explosions of gases. Overhead airplanes whir, driven by explosive engines. Man has conquered the air only since the harnessing of explosions for power, and has never made a practical flying machine driven by any other form of energy. By the roadside farmers plow their fields with tractors driven by similar engines, and blast bowlders and stumps from their fields with charges of high explosives.

"In cities, our water supplies come through aqueducts and tunnels that explosives have helped to build. Diesel engines driven by exploding petroleum are replacing steam engines in factories and ships; and some light and power plants are operated by these highly concentrated and economical mechanisms. Even steam plants and railways are dependent on explosives, for the coal which drives them is torn by powder and dynamite from the bowels of the earth.

"Never since man developed his first crude tools—wooden clubs, stone hammers, and the rest—has he come upon a device or a substance comparable in force to explosives. They give him the powers of a demigod. With them he can come closer to imitating nature's forces than in any other way.

"Explosives depend for their great power on the fact that while occupying a relatively small space, an instant before explosion, their gases occupy a tremendously greater space the instant after. Gunpowder, the first and the 'tamest' of the well-known explosives, exerts, when it explodes in a confined space, 6,000 times the pressure of the atmosphere or nearly 50 tons per square inch. The 'high explosives,' dynamite, gun-cotton, nitroglycerin, and TNT, exert several times the force of powder; and mercury fulminate, the most violent of all, produces a pressure of 200 tons per square inch. The latter finds its chief use in very small quantities in the form of caps used to detonate less violent explosives.

Most Sensitive Explosive.

"All explosives are dangerous and must be handled with caution; but there are definite degrees of dangerousness. Gunpowder and dynamite will not explode unless subjected to a more or less violent jolt. Nitroglycerin and TNT are detonated much more easily. The most sensitive of all explosives is nitrogen-iodide. This substance is so unstable that it is said that the tap of a feather will set it off.

"Even in peace time the United States manufactures large quantities of explosives. In 1925 the total, not considering explosives for ammunition, was more than half a billion pounds. Of this, approximately two-thirds was made up of high explosives and one-third of black powder. A quarter of the high explosives and 86 per cent of the black powder was used in coal mining. Nearly half of all the high explosives were used in metal mining and quarrying, and the remaining quarter was divided about equally between construction work and miscellaneous uses.

"Many absorbingly interesting services to man are hidden behind the miscellaneous classification. Explosives are used among other ways in channel deepening, to produce 'echo waves, in the scientific 'divining rods' of the oil prospector, to aid in draining swamps, to blow up levees for emergency flood protection, to fight great fires, to destroy the bodies of dead animals, to 'shoot' oil wells, to send up signal rockets and fireworks, to cast life lines to ships in distress, to break up ice jams, log jams, and icebergs, and to prepare holes for the planting of trees.

"Man's discovery of explosives is not definitely known. Records do not bear out the widely held opinion that the Chinese invented gunpowder. Pyrotechnic substances such as Greek fire or 'wild fire' were used in the early and middle centuries of the Christian era to frighten enemies or to set fire to their ships. But one of the first definite recipes for gunpowder appears in the writings of Roger Bacon in the Thirteenth century. The first recorded use to propel missiles from cannons was in Florence in 1326.

NOW WOULD TURN GOLD INTO TIN

Seek Means to Balk Shortage of Baser Metals.

London.—The old alchemists tried to turn tin and copper into gold. But British scientists are now thinking of going them one better, by turning gold into tin and copper.

Copper and tin deposits are rapidly running out, while the gold supply continues undiminished. In time, scientists here say, copper and tin will become so valuable that it will pay chemists to transform gold and silver into these more useful metals.

British scientists, in an interview in the Daily Mail, say there is only about 100 years' supply of copper in the world. Cables and electrical devices are using up great quantities of it. The marvelous durability of gold will make it a good substitute for copper when the time comes that gold is more plentiful than copper.

The alluvial deposits of tin in Cornwall have all been worked out, and the only tin now produced there is from vein mining. Five-sixths of all the tin in the world is obtained from such alluvial deposits. England is depending on such small areas as Guiana, Bolivia and Straits Settlements for nearly all the tin which goes into commodities industrially indispensable.

By rearrangement of the electrons of gold scientists say they may some day be able to transmute gold into the baser metals, just as the alchemists tried—vainly—to transmute the baser metals into gold.

Failing that, scientists are looking about for a method of extracting material from space, according to the published symposium.

"Astronomers have recently discovered that there is in certain stars a peculiar sort of matter 20,000 times as heavy as the ordinary earthly matter we know," a scientist is quoted as saying. "A piece of it the size of a golf ball, if placed on a table, would simply crash through the table, and possibly through the floor.

"Now that we know such matter exists in the universe we can predict that in the future, by marshaling our electrons and setting them to work, we shall be making this heaviest-known matter here on earth. Think of its power in explosive shells for the nation which first ferrets out the secret."

Sun to Heat Things Up 15 Trillion Years More

Washington.—The world needn't worry for 15,000,000,000,000 years about the sun failing to give forth its heat, in the opinion of Dr. Charles G. Abbot, noted astrophysicist and secretary of the Smithsonian Institution.

The sun is reducing in mass, but scientists estimate that it will take that long for it to be destroyed. The present belief, he explains, is that the sun and stars furnish their tremendous amount of energy through actual annihilation of the atoms of which they are composed.

Recent research, he said, has disclosed that the sun sends out an amount of energy which would equal if translated into mechanical work one horse power a square yard over the surface of a sphere having a radius of 93,000,000 miles, its distance from the earth.

Berlin Chemist Finds Cure for Rickets

Berlin.—A radical cure for rickets is said to have been found in milk treated with ultraviolet rays in an apparatus constructed by the chemist, Doctor Schoell.

In the apparatus Doctor Schoell was able to subject any desirable quantity of fresh milk in a vacuum to the ultraviolet rays from a quartz lamp, succeeding for the first time in keeping the taste and smell of the milk unchanged.

With the milk so prepared numerous children with rickets at the University hospital of Frankfurt-on-Main were fed and completely cured in from four to six weeks. The advantage of his method of treatment is said to lie in its cheapness and in the facility with which practically unlimited quantities of milk may be prepared for wholesale consumption.

London Zoo Walrus "Ate Self to Death"

London.—"Old Bill," a walrus at the London zoo, ate himself to death. He had the most ravenous appetite of any animal ever known here, and consumed more food than three ordinary elephants.

"Old Bill's" favorite relish was fish. It cost the zoo authorities more than a pound sterling (about $5) a day to keep the wolf of hunger from Old Bill's tank while an elephant may be fed for less than a third of that amount.

It is the fish eaters at the zoo which run up the cost of the commissary department. Seations, too, cost more to feed than elephants. The bill for a sea lion's fish is about £160 a year while an elephant may be kept fat and sassy for about £120 a year.

Meat for the zoo land lions costs less than 2 shillings, or about 50 cents a day a head

USE AIRPLANES TO SMUGGLE ALIENS IN

U. S. Is Perplexed by New Problem of Border.

Washington.—Smuggling of aliens across the Mexican border by airplane is becoming an increasingly perplexing problem to the immigration service, George J. Harris, assistant United States commissioner general of immigration, told the press.

Lack of facilities to check this open avenue of illegal immigration, increasing use of airplanes, and the immensity of the Mexican border were cited by Harris as some of the difficulties facing the service in combating alien smuggling by air.

"It is a big problem," Harris said, "and because the border patrol has no planes, we are practically helpless.

"At present there is nothing we can do about it except to keep a constant watch and attempt, if possible, to obtain information of the movements of planes transporting aliens.

Operations Increase.

"The operations of air smugglers are growing steadily in extent and volume and there is every reason to believe the problem will become greater within a short time because of the increasing use of the airplane.

"The patrol border consists of about 300 men, assigned to cover nearly 2,000 miles of frontier, comprising some of the most rugged and inaccessible territory in the world.

"The patrol, using horses, automobiles and motorcycles, could hardly be expected to cope with airplanes in so vast a district."

The Mexican border, Harris explained, offers every opportunity for smuggling aliens into the United States by plane. The usual method, he said, is to start from a point about 25 to 50 miles below the border before dawn, landing in some isolated spot on the flat floor of the desert, where the planes are met by automobiles.

Harris said the department has captured only a few air smugglers. One plane with three Chinese was captured March 20 last year when forced to land for lack of gas near San Bernardino, Calif.

Canadian Border Rugged.

"We found," he said, "this plane had left the vicinity of Mexicali, Mexico, at about 4:30 a. m. on the day it was captured, with the obvious idea of landing the Chinese in the Mojave desert, near Muroc, Calif.

"Our investigation revealed an automobile was to take the Chinese to San Francisco. The plane and its occupants were taken into custody when they landed."

Harris said he could not estimate the number of aliens being brought in this manner into the United States by airplane.

"We have reason to believe, however, that the number coming through in this manner is steadily increasing.

"The situation along the Canadian border is not so bad, because of the ruggedness of the country."

Tourist Taxes Build Sewers for This Town

Paris.—Building sewers and paving streets with tourist taxes collected to beautify resorts has aroused national criticism of the "taxe de sejour" charged on hotel bills in 160 towns of France.

Enghien-le-Bains, a suburban town north of Paris, where the casino is closed, used its tourist taxes for a sewer. Other towns have diverted their beautification funds into all sorts of normal funds so as to lighten local taxation.

A national tourist association that put over the tourist tax idea now is criticizing it. It mentions that 17,000,000 francs are collected from tourists, but that there is little to show for the money in the way of improvements calculated to encourage touring.

The richest cities also seem to get the most money. Nice heading the list.

There was an effort in parliament recently to repeal the tax because many thought it so annoyed foreign tourists as to make them prefer other countries where there were not so many unexpected extras charged on the hotel bills.

French Census Shows 100,000,000 Population

Paris.—The census held a year ago in all the French colonies has just been published, revealing that there are slightly more than 100,000,000 souls living under the Tricolor.

France herself has a little more than 40,000,000 population. Algeria, Tunis and Morocco have a combined total of 12,454,000, of whom there are more than a million Europeans. Indo-China adds 20,000,000 and the great French territories forming a belt through the middle of darkest Africa are inhabited by almost 20,000,000 negroes. French West Africa counts another 13,000,000.

While the population of France remains rather stationary, the inhabitants of all the colonies are increasing. If the present rate of increase is maintained, their population will double itself in 50 years.

Too True

London.—The advice of George Bernard Shaw to foreigners is that they avoid learning to speak English correctly. "If you do," he says, "no one will understand you."

Broadcasts Good News

Whittier, Calif.—"Dr. Pierce's Favorite Prescription and the 'Golden Medical Discovery' have been used in our family off and on for a long time and they have always given us entire satisfaction. I have taken the 'Favorite Prescription' and so has my mother. It was a wonderful benefit to us. I think it has no equal.

"My father always took the 'Golden Medical Discovery' when he felt rundown, and it never failed to build up his general health in a very short time."—Mrs. J. S. Hilyard, 113 S. Whittier Ave.

If your druggist is out of the "Medical Discovery" or "Prescription," send 65 cents to Dr. Pierce, Buffalo, N. Y., for a package of the tablets.

Are You Listening In?

The SUNSET-DYTINT Singers are broadcasting a program of original songs, duets and quartets over Columbia Nation-wide Radio Stations at 6:30 p. m. every Thursday (Eastern time) beginning Thursday, March 8. $5,000 Prize Contest for users of SUNSET and DYTINT is now in full swing. Prizes announced at each broadcasting from 15 Radio Stations.

If your dealer does not stock SUNSET DYES and DYTINT (the new 100 Tint) write and let us know.

Send 3c stamp for "COLOR NEWS," a new 4-page 4-color publication—it contains full particulars of this interesting contest.

Remember: SUNSET DYES and DYTINT should be in every home where people love color. Write today! Address Dept. R.

Life's current coin is made of plain common sense.

The BABY

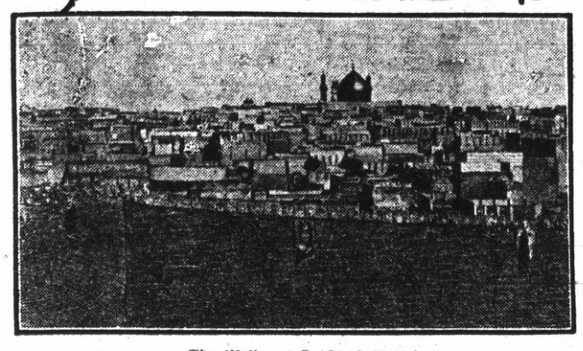

No mother in this enlightened age would give her baby something she did not know was perfectly harmless, especially when a few drops of plain Castoria will right a baby's stomach and end almost any little ill. Fretfulness and fever, too; it seems no time until everything is serene.

That's the beauty of Castoria; its gentle influence seems just what is needed. It does all that castor oil might accomplish, without shock to the system. Without the evil taste. It's delicious! Being purely vegetable, you can give it as often as there's a sign of colic; constipation; diarrhea; or need to aid sound, natural sleep.

Just one warning: it is genuine Fletcher's Castoria that physicians recommend. Other preparations may be just as free from all doubtful drugs, but no child of this writer's is going to test them! Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for Fletcher's CASTORIA

Holy City of the Shias

The Wall and Roofs of Nedjef.

(Prepared by the National Geographic Society, Washington, D. C.)

NEDJEF, a desert city west of the Euphrates in Iraq, is a sort of secondary Mecca in the Mohammedan world. It is the annual pilgrimage place for the Shias, the "dissenters" of Islam, just as Mecca is a goal of pilgrims among the orthodox Mohammedans.

It is five days by mule or camel caravan from Bagdad to Nedjef, and in the eventful centuries since the Shias founded Nedjef—on the spot where a nephew of the Prophet Mohammed was slain—it is estimated that over 25,000,000 Moslems have made the pilgrimage to this mysterious desert city of golden domes, fabulous treasures, and weird rites.

Thousands of devotees from the Shia hordes of India, Persia and Turkestan flock through Bagdad each year, bringing with them their mummified dead—salted and dried—for burial in the holy ground about the mystic city. By camel caravan and winding mule train the patient pilgrims make the long march; many from distant Turkestan are a whole year making the round trip. To help handle the throng that pours through Bagdad each spring and autumn, enterprising Bagdad Jews have established an "arabanah," or stage line, from Bagdad to Kerbela, the half-way town on the desert route to Nedjef. From Kerbela on the way leads through the dreary and monotonous desert—a rolling sea of gray sand, the margin of the great waste that sweeps Arabia from Kerbela and Nedjef to Mecca, Aden, and the Red sea.

As one approaches Nedjef he sees first the great gold dome of its mosque, burning in the sun rays; then, the high, frowning walls that surround the sacred city. It is a gorgeous spectacle, miragelike vision, as of a mighty city floating in the air. The high, sharp walls shut it off abruptly from the desert, and it seems a mighty thing apart from the surrounding sea of sand.

Nedjef is a freak city. Not a green thing—a plant, shrub, or tree—lives within its dry, hot limits. It is built on a high plain of soft sandstone. The narrow, crooked streets, in many places mere passages three or four feet wide, wind about like jungle paths. In the Arab quarter the mud-plastered houses are all two stories high and, odd as it sounds, have no windows facing the street. Only a wooden door, massive and bolt-studded, but so low that one must stoop to enter, opens to the street.

Cellars Are Refuges From the Heat.

One of the strange features of this strange city is its cellars. In summer the fierce heat drives the panting people deep down into the earth, like rats in a hole. Beneath every house is a cellar, burrowed minelike to amazing depths; one, it is said, reaches an astoundingly low level, being more than 100 feet below the street. Down into these damp, dark holes the Shias flee when the scorching desert air sizzles above and imported German thermometers stand at 130 degrees Fahrenheit. Some of the cellars (serdabs) are arranged in a tier of cells or rooms, one below the other; the upper room is used in the first hot months, the family going lower down as the heat increases.

So many of these vast underground retreats have been dug that the excavated material, carried from the city on donkeys' backs and dumped on the desert outside, forms a great hill over 100 feet high, from the top of which a fine view of the city may be had. It is said that many of these serdabs are connected by means of underground corridors, and that criminals, who swarm in Nedjef, easily elude capture by passing through these tunnels from house to house, finally emerging at a point in the city remote from their place of disappearance.

In the heart of Nedjef, its great dome visible for miles on the surrounding desert, stands the magnificent mosque of Abbas, the shrine that draws the teeming throng from all the Middle East.

Turning from the native quarter, the visitor comes to the long straight bazaar leading to the mosque. He is struck with the difference in the looks of the Nedjef people and the crowds at Kerbela. Many uncouth, swaggering desert men are among them, their long hair, faded dress, and camel sticks, or oversupply of guns and side-arms, marking them as from the wild places. There is a spirit of crude, barbaric primitiveness in the crowd that surges past. The little touches of outside influence one sees at Bagdad, like an occasional European hat or an imported overcoat, are all lacking at Nedjef. Here is old Arabia in original bindings.

Beauties of the Mosque.

The mosque is come upon suddenly, for the crowded bazaar street ends in an open plaza before this dazzling structure.

In amazement one gazes on its wonderful facade; golden tiles and fancy silver work rise above and about the great portal, and across the wide entrance is hung a giant chain of brass, worn smooth and shiny from contact with the millions of turbans, tarbooshes, and keffeyehs which have brushed under it in centuries gone by. This chain is so hung that all who enter the mosque must bow.

Through this open gate can be seen the base of the great mosque itself. The great gold tiles which cover the dome also run to the very base of the mosque. And on the inside of the walls about the court are more gold tiles. Above the outer portal, too, on the outside, are sprawling Arabic characters 20 inches high, seemingly cut from sheets of gold. What must this barbaric splendor have cost!

The cost of the wonderful temple itself is but a bagatelle compared with the value of the treasure in its vault. For ages, be it known, Indian princes, shahs, and nobles of the Shia faith have made precious gifts to this temple at Nedjef, pouring into it a priceless stream of jewels, gold, and plate. The looting of the Nedjef mosque has been a favorite dream of soldiers in the Middle East. The true enormity of the treasure at Nedjef was only brought to light less than a generation ago when the shah of Persia made the hahj and the pent-up wealth was revealed to his royal gaze by its zealous official keeper, the "Kilitdar."

But no Christian has ever seen the inner glories of the great mosque of Abbas at Nedjef. The contrast between two faiths is striking; a Moslem walking into a Christian church is made welcome; a Christian who walked into the Moslem mosque at Nedjef would be slain as a defiler; yet both claim the same God!

More human bodies are buried in the plain outside the walls of Nedjef, it is said, than in any other one spot on earth. Myriads of fancy tombs, terminating at the top in little blue-tiled domes, rise from the plain. And all the millions of pilgrims who have come in ages past with corpses for burial have also brought money to spend. The richer the man who brings the body, the greater the toll taken.

Burial There Is Costly.

Burial sites within view of the great mosque bring a high price. Tax is laid on every corpse imported from India, Persia, etc. Many bodies are smuggled in. It is told of one astute Persian pilgrim that he divided his grandfather's skeleton and sent it in separate parcels by mail to save freight and tax.

When a death caravan reaches the outskirts of Nedjef, they unpack their grewsome baggage and prepare the various bodies for burial. The crude methods of embalming or mummifying would expose Nedjef to disease were it not for the dry desert air. The very few folk of Nedjef who work for a living make money manufacturing fancy shrouds, stamped with Koranic sentiments, for the burial of corpses brought in by the pilgrims.

Others turn out prayer bricks ("Torba"), which every Shia uses in his daily prayers. These are made from holy clay, scooped up from the great cemetery and pressed into tiny odd-shaped bricks, and also stamped with an inscription from the Koran. When a Shia prays, he lays this torba on the ground, faces Nedjef, and prostrates himself, touching his forehead against the sacred brick.

In all of this unnatural city one sees not a tree or shrub; not even a potted plant. It is a dry, prisonlike place of somber gray stones and mud-plastered walls. Remove its mosque, its one priceless possession, and Nedjef, with its horde who live on those that come to pray, would perish from the earth. In the 1,200 years of its eventful life not one useful article has been manufactured within its fanatical precincts.

Yet in all Islam, Shias turn to Nedjef to say their prayers. To Nedjef every good man must make the pilgrimage once in his life, and at Nedjef he hopes to be buried when he dies.

LIFE'S LITTLE JESTS

A NASAL COMPLEX

Sometimes I feel as districted as the small boy's mother, when a great financier was coming to Sunday luncheon, writes Mary Roberts Rinehart in the Saturday Evening Post. Now this financier had a very large and bulbous nose, and Johnnie was warned neither to stare at it nor to mention it. Nor did he, but when the coffee came on and Johnnie was finally excused, his distracted mother turned to the guest and said:

"Mr. Blank, will you have sugar and cream in your nose?"

College Sweetheart

"Mother, that boy of ours ain't doin' nothin' at college, but foolin' 'round with the girls."

"Oh, I think not, Hiram—he's a-workin' hard, I know."

"A-workin' hard, eh? Then what you make of this here Alma Mater he's allus writin' 'bout he loves so much?"

LOTS IN A NAME

She—What's in a name?
He—There's a lot in Lottie.

See Ourselves

To see ourselves as others see us
Would not from many follies free us.
If we ourselves could pick the "others"—
Our sweethearts and our doting mothers.

Jail Joke

Two Irishmen were in prison, one for stealing a cow, the other for stealing a watch. The former thinking to have some fun at the other's expense, asked:

"Pat, what time is it?"

"Faith, I'm not quite sure, but I think it's about milking time."

Linked

"You look depressed, old man. What are you thinking of?"

"My future."

"And what makes that seem so hopeless?"

"My past."

A POOR MEMORY

First Monk—What's Mr. Giraffe got a knot tied in his neck for?

Second Monk—That's so he'll remember the things he has to get in town today for Mrs. Giraffe.

Back to Sleep

How sweet, to waken in the morn,
When daylight first begins to creep
Across the world, and then to turn
Right back again—and go to sleep.

A Better One to Tell

Ted—We were in a rowboat. I hooked a fish that I was afraid to haul in for fear I would swamp the boat.

Jerry—The same thing happened to me—on an ocean liner.

Prejudicial Precaution

"Are you a psychoanalyst?"

"Yes. But the fact that you consult me prejudices your case. I am compelled to assume at the outset that you are guilty."—Washington Star.

Donkey Expression

Marie—Here comes Jack. Hasn't that donkey the same expression on its face as that on Jack's?

Lois—Sh-h h. He might hear you.

Marie—I didn't think donkeys understood.

Poor Uncle

Groom—What's the matter, dear?

Bride—I can't understand why Uncle John didn't send a wedding present! He always, without fail, sent one before!

ALABASTINE

Alabastine for all your walls

For sleeping rooms—formal parlors and reception halls—dining room and living room—for the library—and for public buildings. Properly applied it won't rub off.

Write to us or ask your dealer for a copy of our free drawing book for children—"The Alabastine Home Color Book"—and a free color card.

Write to us also for our beautiful free book "Artistic Home Decoration" by our Home Betterment Expert, Miss Ruby Brandon, Alabastine Company, 222 Grandville Ave., Grand Rapids, Mich.

Alabastine—a powder in white and tints. Packed in 5-pound packages, ready for use by mixing with cold or warm water. Full directions on every package. Apply with an ordinary wall brush. Suitable for all interior surfaces—plaster, wall board, brick, cement or canvas.

Better and more Economical

When Father Was It

Proud Parent (who served)—What I told you is the story of the World war.

His Son—But, papa, what did they need the rest of the army for?—London Answers.

British scientists have succeeded in making the hormone of the thyroid gland synthetically from coal tar products and iodine.

Poland Honors Great Writer and Patriot

Waclaw Sieroszewski, to whom the city of Warsaw has granted a liberal monetary award in acknowledgment of his literary talent and in recognition of his merits as a patriotic citizen, is perhaps the most distinguished of living Polish writers. His life has been one of extraordinary interest and adventure. Sieroszewski came of a family of country gentry distinguished for their patriotism. The insurrection of 1863 completely ruined them, and the boy Waclaw was brought up by relatives. When scarcely of age he became involved in political intrigue and was banished by the Russians to Siberia, whence he twice tried to escape. He was then banished to Kolymsk on the edge of the forests, which gave the material for several of his finest stories. Returning to Poland at the time of the Japanese-Russian war, he was again arrested for participation in a revolutionary movement, but was enabled to escape abroad.

Money From Walrus Tusks

For centuries before white men came Eskimos used only the blubber of the walruses they killed. The tusks and other parts of the animals were piled up in great heaps of refuse. In time everything but the bones and tusks rotted away. In late years the tusks of freshly killed walruses have been bought by American and Canadian traders for ivory. Then the Eskimos began digging up the tusks from the dumping grounds. They are still in perfect condition. The supply of these old tusks seems inexhaustible and the Eskimos are getting rich salvaging them.—Capper's Weekly.

Page Miss Venus

"Yes, dearie, Irving Thalberg practically promised me the part of Venus in that dream sequence in 'Hell's Paradise,' and then that research editor, or whatever you call him, steps up and says:

"'She can't play Venus—she's got a vaccination mark on her arm.' Can you beat it?"

"It just proves what I always says, honey. These high brows is goin' to ruin the picture game."—Los Angeles Times.

Some marriages are failures because parties quit dishing out polite falsehoods after the ceremony.

In the pursuit of happiness, suppose we decide to move all together instead of each for himself.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Bayer Aspirin.* The name Bayer is on every tablet, and on the box. If it says Bayer, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Bayer Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Bayer—at any drugstore—with proven directions.

Physicians prescribe Bayer Aspirin; it does NOT affect the heart

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Combining Old and New

The Greek Y. M. C. A. proposes to erect at Athens a "Temple of Youth" which will rival the ancient architectural monuments of that country and yet be supplied with all the conveniences of the modern recreational center. One million dollars is being raised for the purpose and the financial assistance of several wealthy Americans has been enlisted in the project. The American end of the movement is known as the North American co-operating committee.

There Are Some

"I don't see why Alice should be unhappy, she can run things to please herself."

"True, but she's so hard to please that she can't ever please herself."—Boston Transcript.

Vegetable Extract Latest

Extracts of vegetables similar to certain extracts of meat have appeared in Europe. They are actually the real vegetables subjected to a process which, after several years of experiment, has made it possible to preserve all the essentials of lettuce, celery, potatoes, cabbage, onions and other products of the garden in concentrated form. They are said to be especially suitable for soup, one pound of the extract making 60 cups. Domestic and tropical fruits will be added later.

Rare Occurrence

King—"Did you ever see a three dollar bill?" York—"No!" King—"Well—here's one from my dentist."

The best honesty is lived.

TOLEDO, OHIO

Santa Fe Improvement Program *for* 1928

Railways serving a growing country are never finished. They must add yearly to the number of cars and locomotives in order to care for increasing traffic. They must build extensions and provide second and third tracks. They must provide larger terminal yards and longer and more sidings. They must provide heavier bridges and larger and more commodious stations, roundhouses and shops.

This expansion in facilities requires additional cash investment in the railroads of this country, amounting to over half a billion dollars annually.

The Santa Fe proposes to spend 45 million dollars on its program for enlargement of such facilities during 1928.

Orders have already been placed for 3,850 new freight cars, 75 all-steel passenger train cars, and 771 miles of new steel rail, of which 490 miles will be 110 lbs. to the yard and the balance 90 lbs. When this steel is laid the Santa Fe will have 2,182 miles of 110 lb. rail all laid since January 1, 1925. Orders have been placed for steel for bridges, ties have been purchased, and work on more second track and other improvements is in progress.

The Santa Fe puts this large additional investment of new money into its property to increase its capacity, to render service, to promote safety, and to take care of the growing needs of the country it serves.

Simple Tax Laws the Best

What this country needs now more than anything else in the field of taxation is a simplification of the tax laws, common sense thinking, coupled with efficient and intelligent administration. Involved laws and rules governing taxation have caused much dissatisfaction. The individual should have some idea of how much tax he should have to pay without having to employ an attorney to aid him in the making of calculations. Our courts today are crowded with tax questions and interpretations of tax laws. This creates an element of uncertainty which is very disconcerting both to public officials and to taxpayers.

Our tax laws should be simple and understandable, so that all of the people should know what they are paying all of the time.

Taxes Affect Eyeryone

You may charge taxes to things but things don't pay taxes. We well know that taxes do not necessarily rest where they are assessed. Just as a thermometer is used for measurement of heat, so are taxes on things levied for the sake of measurement. Taxes do not stay where you assess them. The heat which the thermometer measures covers everyone. Taxes, like the heat, affect everyone. Taxes show themselves in our daily cost of living. There is no such person in this country, or in this state, or in any community as a non-taxpayer. As has well been stated, every man and woman in this country works between two months and six weeks out of every year to pay the national, state and local taxes.

Things Richmond Has Acquired

"Richmond—14 miles of water-front."

"Richmond—106 miles of paved streets."

"Richmond—20 days nearer the Orient than New York."

"Richmond—home of the world's largest oil refinery."

"Richmond—growing at 15% a year."

"Richmond—selected by Ford for site of his largest Pacific Coast plant."

Look for Opportunity for Good Investment

You do not have to go a thousand miles from home to make money. Opportunities are all around you. Look about. Keep your eyes and ears open. Ask questions. Investigate. If you find—and you will—an enterprise in your town which has fallen on evil days, get at the reason for its difficulties. It may be bad management, it may be dishonesty, it may be extravagance, it may be faulty manufacturing, it may be any one of a hundred things. No matter! If the business is one which justifies itself—that is, if it serves or tries to serve, some good purpose—the chances are nine in ten that, some day, somehow, it will "come back." When it starts—when it is evident that it is headed upgrade, put what money you can spare into it. You may lose; but I doubt it. One of the richest men I know bought stock in the company of which he is now president and the largest stockholder when it was so thoroughly discredited that its $100 shares were selling at less than a dollar, and he was bookkeeper on a salary of less than $100 a month. But, investigate before you invest, not after, if you would play safe.—From The New Age Illustrated.

Ever Hear of Air Fishing?

An air-fishing tribe of Igorotes recently was discovered north of Manila by a hiking detachment of United States marines. They fly queer-looking kites, with baited hooks at the end of the tails, every evening about dusk. They fish for bats in the air.

Have it printed at The Terminal.

WHAT MORE COULD THE HEART DESIRE?

A semi-precious gem, radiant in its glowing hues of alluring color; a dainty setting to hold secure this ever glistening fascination; truly a symbol of feminine charm and a jewelled possession untouched by time.
Many such exquisite rings await your selection in our new display.

NOTICE TO CREDITORS

In the Southern Division of the United States District Court, for the Northern District of California, Second Division No. 16787, in Bankruptcy.

In the matter of John F. O'Neill, bankrupt.

To the creditors of John F. O'Neill, bankrupt.

Notice is hereby given that on the 23d day of February, 1928, the said John F. O'Neill was duly adjudicated a bankrupt and that the first meeting of his creditors will be held at the office of Burton J. Wyman, referee in bankruptcy, No. 1806 Tribune Tower, Oakland, California, on the 14th day of March, 1928, at 2 o'clock p. m., at which time the said creditors may attend, prove their claims, appoint a trustee, examine the bankrupt and transact such other business as may properly come before said meeting.

Claims must be in the form required by the Bankruptcy Act and sworn to.

Dated Oakland, California, February 24, 1928. BURTON J. WYMAN,
Referee in Bankruptcy for the Counties of Alameda and Contra Costa, State of California.

LEGAL NOTICES

NOTICE OF TRUSTEE'S SALE

Whereas Giles M. Briggs, by deed of trust bearing date of September 10, 1926, recorded September 14, 1926, in Liber 60 of Official Records at page 23, in the office of the County Recorder of the County of Contra Costa, State of California, did grant, bargain, sell, convey and confirm unto J. G. Sjoberg and W. S. Angwin, as trustees, the premises therein and hereinafter described, to secure among other things the payment of the sum of $161.35 with interest, according to the terms of a certain promissory note of even date with said deed of trust, executed and delivered by said Giles M. Briggs to W. McKaoun, a married man.

Whereas said promissory note and said deed of trust were on the 29th day of November, 1927, duly assigned to D. L. Beatty, which said assignment was recorded on the 1st day of December, 1927, in Liber 91 of Official Records at page 482, in the office of the County Recorder of the County of Contra Costa, State of California; and

Whereas, default has been made in the payment of the principal and of the interest due under the terms of the promissory note secured by said deed of trust, and

Whereas on the 1st day of December, 1927, a notice of such breach and of election to cause to be sold the property hereinafter described to satisfy said obligation, was by said D. L. Beatty duly recorded in the office of the County Recorder of said Contra Costa County, State of California in Liber 91 of Official Records at page 482, and

Whereas, thereafter said D. L. Beatty made written demand upon the undersigned as trustees under said deed of trust to sell the real property therein and hereinafter described to satisfy said indebtedness.

Now, therefore, pursuant to said demand and in accordance with the power and authority conferred upon them by said deed of trust said J. G. Sjoberg and W. S. Angwin as such trustees does hereby give notice that on Monday, the 26th day of March, 1928, at the hour of 11 o'clock a. m. of said day on the property hereinafter described said trustees will sell at public auction to the highest bidder for lawful money of the United States all the interest conveyed to said trustees in and to the real property described in said deed of trust, being that certain lot, piece or parcel of land, situate in the City of El Cerrito, County of Contra Costa, State of California, and particularly described as follows, to-wit:

All that certain lot, piece or parcel of land situate, lying and being in the City of El Cerrito, County of Contra Costa, State of California, described as follows:

Commencing at a point on the Southerly line of Stockton Avenue, distant South 43° 31' 10" West 40 feet from the point of intersection of the Southerly line of Stockton Avenue with the Westerly line of Pomona Avenue, said point of intersection being the most Northerly corner of Lot 14, as shown on Map hereinafter referred to; thence from said point of commencement, Southerly parallel to the Westerly line of Pomona Avenue, on the arc of a curve to the left having a radius of 1725.80 feet, a distance of 103.56 feet to a point on the Southerly line of Lot 14; thence South 38° 25' 16" West 40 feet; thence Northerly parallel to the Westerly line of Pomona Avenue on the arc of a curve to the right having a radius of 1765.80 feet, a distance of 107.12 feet to a point on the Southerly line of Stockton Avenue; thence North 43° 31' 10" East 40 feet to the point of commencement. Being a portion of Lot 14.

As said lot is delineated upon that certain Map entitled, "Sheet No. 1, BERKELEY COUNTRY CLUB TERRACE, Unit No. 1, Contra Costa County, California," being a portion of Lot No. 3 of the final partition of the San Pablo Rancho, Contra Costa County, Cal. Filed on the 18th day of September, 1922, in the office of the County Recorder of the County of Contra Costa, State of California.

Terms of sale: Cash in lawful money of the United States of America; ten per cent (10%) payable to the undersigned trustees at the fall of the hammer; balance payable upon delivery of deed; and if not so paid unless for want of title ten (10) days being allowed for search, the said ten per cent (10%) to be forfeited and sale to be void.

Dated: March 1, 1928.
(Seal) J. G. SJOBERG
and W. S. ANGWIN,
Trustees.

NOTICE OF TRUSTEE'S SALE

Whereas Giles M. Briggs, by deed of trust bearing date of September 10, 1926, recorded September 14, 1926, in Liber 37 of Official Records at page 497, in the office of the County Recorder of the County of Contra Costa, State of California, did grant, bargain, sell, convey and confirm unto J. G. Sjoberg and W. S. Angwin, as trustees, the premises therein and hereinafter described, to secure among other things the payment of the sum of $161.35 with interest, according to the terms of a certain promissory note of even date with said deed of trust, executed and delivered by said Giles M. Briggs to W. McKaoun, a married man.

Whereas said promissory note and said deed of trust were on the 29th day of November, 1927, duly assigned to D. L. Beatty, which said assignment was recorded on the 1st day of December, 1927, in Liber 95 of Official Records at page 461, in the office of the County Recorder of the County of Contra Costa, State of California; and

Whereas, default has been made in the payment of the principal and of the interest due under the terms of the promissory note secured by said deed of trust, and

Whereas on the 1st day of December, 1927, a notice of such breach and of election to cause to be sold the property hereinafter described to satisfy said obligation, was by said D. L. Beatty duly recorded in the office of the County Recorder of said Contra Costa County, State of California in Liber 91 of Official Records at page 484, and

Whereas, thereafter said D. L. Beatty made written demand upon the undersigned as trustees under said deed of trust to sell the real property therein and hereinafter described to satisfy said indebtedness,

Now, therefore, pursuant to said demand and in accordance with the power and authority conferred upon them by said deed of trust said J. G. Sjoberg and W. S. Angwin as such trustees does hereby give notice that on Monday, the 26th day of March, 1928, at the hour of 11 o'clock a. m. of said day on the property hereinafter described said trustees will sell at public auction to the highest bidder for lawful money of the United States all the interest conveyed to said trustees in and to the real property described in said deed of trust, being that certain lot, piece or parcel of land, situate in the City of El Cerrito, County of Contra Costa, State of California, and particularly described as follows, to-wit:

All that certain lot, piece or parcel of land situate, lying and being in the City of El Cerrito, County of Contra Costa, State of California, described as follows:

Commencing at a point on the Southerly line of Stockton Avenue, distant South 43° 31' 10" West 80 feet from the point of intersection of the Southerly line of Stockton Avenue with the Westerly line of Pomona Avenue, said point of intersection being the most Northerly corner of Lot 14 as shown on Map hereinafter referred to; thence from said point of commencement Southerly parallel to the Westerly line of Pomona Avenue on the arc of a curve to the left having a radius of 1765.80 feet a distance of 107.12 feet to a point on the Southerly line of Lot 14 hereinafter referred to; thence South 38° 25' 16" West Forty feet; thence Northerly parallel to the Westerly line of Pomona Avenue on the arc of a curve to the right, having a radius of 1805.80 feet, a distance of 110.68 feet to a point on the Southerly line of Stockton Avenue; thence North 43° 31' 10" East 40 feet to the point of commencement. Being a portion of Lot 14.

As said lot is delineated upon that certain Map entitled, "Sheet No. 1 BERKELEY COUNTRY CLUB TERRACE, Unit No. 1, Contra Costa County, California," being a portion of Lot No 3 of the final partition of the San Pablo Rancho, Contra Costa County, Cal. Filed on the 18th day of September, 1922, in the office of the County Recorder of the County of Contra Costa, State of California.

Terms of sale: Cash in lawful money of the United States of America; ten per cent (10%) payable to the undersigned trustees at the fall of the hammer; balance payable upon delivery of deed; and if not so paid unless for want of title ten (10) days being allowed for search, the said ten per cent (10%) to be forfeited and sale to be void.
